The copies of the journal to members of the association are sent by ordinary post. The editorial board, association or publisher will not be responsible for non-receipt of copies. If any of the members wish to receive the copies by registered post or courier, kindly contact the journal's/publisher's office. If a copy returns due to incomplete, incorrect or changed address of a member on two consecutive occasions, the names of such members will be deleted from the mailing list of the journal. Providing complete, correct and up-to-date address is the responsibility of the members. Copies are sent to subscribers and members directly from the publisher's address; it is illegal to acquire copies from any other source. If a copy is received for personal use as a member of the association/society, one cannot resale or give-away the copy for commercial or library use.

Access to scientific research papers

Dear Sir,

Congratulations on the successful publication of the 40th volume of our journal. As mentioned in your editorial it is indeed a landmark. The quality of the academic content of the journal has gone up by leaps and bounds over the last few years. We have also come to expect the journal regularly and on time. As members of APSI we are proud to be associated with IJPS which is now on par with most international journals. Hats off to you and your team for the same!

Your point about IPR (intellectual property rights) and opposing views vis-à-vis the publisher and the author are very valid. The concept of "open access journals" could probably attempt to remedy this gap. Open access journals are journals that use a funding model that does not charge readers or institutions for access. For a journal to be included in the directory of "open access journals" it is mandatory for users to have the right to "read, download, copy, distribute, print, search or link to the full texts of these articles". Quality Control is in the form of peer-review or editorial quality control. Free flow of information using "open access journals" is now gaining momentum.^[1,2] The following are good links to information about open access and open access journals –

Directory of open access journals (Lund University) <http://www.doaj.org/>

FreeMedicalJournals.com <http://www.freemedicaljournals.com/>

Budapest Open Access Initiative <http://www.soros.org/openaccess/index.shtml>

Open Access News <http://www.earlham.edu/~peters/fos/>

In this day and age of emails and with most journals accepting online articles one avenue is yet open to us i.e. obtaining the article from the author directly via an email request (akin to reprints). So for someone who is genuinely interested in obtaining the article and willing to go the extra mile for it, the absence of "free full access" journals need not pose an insurmountable barrier. Personal communication with the author usually does produce the article more often than not.
